- Anushka Shankar

Introduction

- A user-centric web application for enhancing productivity.
- Addresses procrastination, lack of focus, and planning issues.
- Has features like Pomodoro, To-Do , Eisenhower matrix, etc.

Objectives

- To learn web development via the process
- To implement our learnings and knowledge into our web-app.
- To deploy it and provide a solution to the raised issue.

Tech Stack

1: Frontend

2: Backend

3: Database

4: RESTful APIs

Project Details

Work Done

1. Started -
2. Paused -
3. Resumed -

GitLab Repository and Commit History

Code statistics

Language	Lines Of Codes
HTML	1000
CSS	1200
Javascript	500
NodeJS	400
EspressJS	300
MySQL	200

Challenges and Learnings

Challenges

1. Inconsistent with the project
2. Lacking in time management
3. Taking excess time for backend

Learnings

1. Team collaboration and project management
2. Learnt MERN Stack technologies
3. Breaking things down into smaller parts makes implementation easy.

Future Scope

- Good Scroll.
- Points for Pomodoro.
- Leaderboard.
- Marathon Mode.
- Fill the Container.
- The Hour Rule.

Hence, Let's ACHIEVO

Thank You !
